

Important information for healthcare professionals regarding Lundbeck's operations during the COVID-19 pandemic

Like many organizations across the country and around the world, Lundbeck is closely monitoring the COVID-19 pandemic and its impact on patients, communities and dedicated healthcare providers like you. We have a commitment to improving the lives of people affected by brain diseases, and we understand the challenges those living with or treating neurologic and psychiatric diseases may be facing now. Our priority is to protect the well-being of those we serve as well as our 1,000 Lundbeck colleagues nationwide, and so we are taking action to limit the escalation of the virus while maintaining support of our provider and patient communities.

All Lundbeck field and office-based employees are working from home until the pandemic is under control and it is appropriate to return to normal activities. This means that for now you will not see our Account Managers or Medical Science Liaisons in your offices. We will, however, remain fully available to appropriately support you with delivery of care to your patients. If you would like to be connected to a Lundbeck representative in your area, please call +1 (866) 337-6996 and leave a detailed message. Your message will be returned by a local Account Manager within 48 hours.

We are proud to continue to partner with you to serve those living with brain diseases during this unprecedented time, as you work directly with them.

For more information on Lundbeck's response to the COVID-19 pandemic, [please visit our Newsroom](#).
